PROFESSIONAL SUMMARY

Hands-on developer with experience building web applications, providing technical support, and working with data and digital systems. Experienced with frontend development, backend APIs, databases, troubleshooting, and software configuration through professional, internship, and personal projects. Seeking an entry-level software development, web development, IT support, or systems support role where I can apply my technical skills and continue growing through practical work.

WORK EXPERIENCE

ICT SUPPORT STAFF DepEd – SDO Mountain Province, ICT Section	JANUARY 2026 – APRIL 2026
• Provided technical support to school personnel and ICT staff for account, software, device, and connectivity-related concerns across schools in the division. • Created and managed Google Workspace and Microsoft accounts, including account setup, password resets, and access-related support to help personnel maintain access to required digital systems. • Assisted school heads and personnel with software installation, account configuration, workstation setup, and Microsoft software updates and troubleshooting to support day-to-day operations. • Provided technical assistance during CBNAT examination activities, including digital setup and configuration of the testing environment to support examination readiness. • Consolidated and validated ICT inventory and internet connectivity information from 266 schools, identifying incomplete, inaccurate, or inconsistent submissions for correction and follow-up. • Maintained ICT records and spreadsheets using Microsoft Excel and other productivity tools while coordinating with school personnel and ICT staff to resolve data, documentation, and technical concerns. • Served as a Technical Resource Person during the orientation on ICT Inventory, Personnel Masterlist, and Internet Connectivity Data, helping school personnel understand data requirements and submission procedures.	
IT INSTRUCTOR I Mountain Province State University	AUGUST 2024 – JULY 2025
• Planned and delivered instruction across three semesters in programming, operating systems, platform technologies, software engineering, Discrete Mathematics, and Living in the IT Era. • Developed and organized digital learning materials, activities, and technical resources using Microsoft Office and Google Workspace to support classroom and project-based instruction. • Guided students through technical projects, helping them address project organization, documentation, implementation, troubleshooting, and problem-solving challenges. • Evaluated student outputs and provided technical feedback to help students improve project quality and meet course requirements. • Coordinated with faculty through meetings and shared digital workspaces while managing class records, reports, schedules, and student inquiries.	
WEB DEVELOPMENT INTERN (OJT) Mines and Geosciences - CAR	SEPTEMBER 2023 – NOVEMBER 2023
• Developed a web-based document monitoring and management system to organize documents and track file completion across provincial areas. • Implemented document classification features to organize records into defined categories and support easier document retrieval. • Created an interactive map feature that allowed users to identify provinces and monitor document completion status through visual interaction. • Applied responsive web design principles to provide an accessible interface across different screen sizes. • Tested and refined application features against project requirements and user needs, identifying and addressing issues during development.	

SELECTED PROJECTS

Tugon | Issue Reporting and Management System
React, Vite, JavaScript, Tailwind CSS, Node.js, Express, PostgreSQL

- Developed a full-stack issue reporting and management system designed for schools and offices.
- Built role-based functionality for administrators, coordinators, and reporters.

- Implemented issue submission, status tracking, priority management, category management, user management, and reporting features.
- Developed a REST API using Node.js and Express with PostgreSQL for persistent application data.
- Built reusable React components for dashboards, tables, modals, forms, and issue management views.
- Applied role-based access and backend validation to separate functionality across user roles.
- Portfolio: <https://cjl-portfolio-five.vercel.app/>
- Demo: <https://tugon-issue-reporting-and-management-jfr9-dusky.vercel.app/>
- GitHub: <https://github.com/cj67pl/community-issue-tracker>

Job Finder | Job Search Practice Application
JavaScript, React, API Integration

- Built a web application for presenting and working with job-related information.
- Practiced working with API-based data, frontend state management, filtering, and user interface components.
- Designed the application to present job information in a structured and accessible format.
- GitHub: <https://github.com/cj67pl/Job-Finder>

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING | University of the Cordilleras, Baguio City DECEMBER 2023

SKILLS

Programming and Web Development: JavaScript, HTML5, CSS3, React, Node.js, Express.js, Responsive Web Design
Databases and Data: PostgreSQL, MySQL, SQL, Data Validation, Data Classification, Data Cleaning, Data Organization, Data Entry, Record Management
Development Tools: Git, GitHub, Visual Studio Code, Postman
Data and Productivity Tools: Microsoft Excel, Google Sheets, Microsoft Office, Google Workspace
Research, Documentation, and Design: Information Verification, Web Research, Technical Documentation, Report Preparation, Figma, Draw.io, Wireframing
IT Support: Computer Troubleshooting, Hardware Maintenance, Software Installation, Device Setup, Technical Support
Professional Skills: Problem-Solving, Debugging, Analytical Thinking, Requirements Analysis, Organization, Accuracy Checking, Documentation, Quality Control
