PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on experience in web development projects, programming, technical support, and IT instruction. Familiar with HTML, CSS, JavaScript, Python, and SQL, with experience using Git, GitHub, and modern development tools. Brings strong problem-solving, troubleshooting, attention to detail, and a willingness to learn new technologies. Seeking an entry-level web or software development role to apply and further develop practical programming skills.

WORK EXPERIENCE

ICT SUPPORT STAFF | DepEd – SDO Mountain Province, ICT Section

JANUARY 2026 – APRIL 2026

- Consolidated and organized ICT inventory and internet connectivity information from 266 schools, supporting division-wide monitoring and reporting requirements.
- Validated and reviewed submitted ICT data for completeness and consistency, helping identify missing, incorrect, or incomplete information before consolidation.
- Assisted and guided school personnel in completing ICT inventory and connectivity requirements, helping improve the accuracy and completeness of submitted records.
- Maintained and updated digital records and spreadsheets using Microsoft Excel and other productivity tools, ensuring technical information remained organized and accessible.
- Coordinated with school personnel and ICT staff to address data, documentation, and submission concerns, supporting smoother communication and timely reporting.
- Provided technical support during ICT monitoring and validation activities and served as a Technical Resource Person during the orientation on ICT Inventory, Personnel Masterlist, and Internet Connectivity Data.

IT INSTRUCTOR I (Emergency Faculty) | Mountain Province State University

AUGUST 2024 – JULY 2025

- Planned and delivered instruction for IT-related courses across 3 semesters, supporting student learning in technical and computing-related subjects.
- Developed and organized digital learning materials, activities, and technical resources using Microsoft Office and Google Workspace to support classroom and project-based instruction.
- Guided and mentored students in completing technical projects by providing assistance with project organization, documentation, implementation, and troubleshooting.
- Evaluated and documented student outputs and academic records, providing constructive technical feedback to help improve project quality and learning outcomes.
- Coordinated with faculty members through meetings and shared digital workspaces, supporting efficient communication and information sharing across academic activities.
- Managed class records, reports, schedules, and student inquiries while maintaining organized academic documentation and meeting institutional requirements.

WEB DEVELOPMENT INTERN (OJT) | Mines and Geosciences - CAR

SEPTEMBER 2023 – NOVEMBER 2023

- Developed a web-based file management and monitoring system to help organize documents and track file completion across provincial areas.
- Implemented file classification features that enabled users to organize and retrieve documents more efficiently based on defined categories.
- Created an interactive map feature that allowed users to identify provinces and monitor the completion status of required files through visual interaction.
- Applied web development technologies and responsive design principles to build an accessible and user-focused interface.
- Tested and refined application features based on project requirements and user needs, helping improve functionality and usability.
- Researched travel procedures and destination information on the Internet, created and maintained relevant files and databases, and stayed in constant communication with employees, customers, and venues.
- Develop and implement operational strategies that improved productivity of the office.
- Created capital and operating budgets and exceeded financial targets for 12 commercial shopping centers.

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING | University of the Cordilleras, Baguio City DECEMBER 2023

SKILLS

- Programming & Web Development: JavaScript, SQL, HTML5, CSS3, React, Node.js, Express.js, Responsive Web Design
- Databases & Data: MySQL, PostgreSQL, Data Validation, Data Classification, Data Cleaning, Data Organization, Data Entry, Record Management, Information Categorization, Structured Data
- Data Quality & Review: Accuracy Checking, Completeness Review, Consistency Checking, Error Identification, Quality Control, Guideline Compliance, Pattern Recognition
- Development Tools: Git, GitHub, Visual Studio Code, Postman
- Data & Productivity Tools: Microsoft Excel (Formulas, Sorting, Filtering, PivotTables, VLOOKUP/XLOOKUP), Google Sheets, Microsoft Office, Google Workspace
- Research, Documentation & Design: Information Verification, Web Research, Technical Documentation, Report Preparation, Structured Record Keeping, Figma, Draw.io, Wireframing
- IT Support: Computer Troubleshooting, Hardware Maintenance, Software Installation, Device Setup, Technical Support
- Professional Strengths: Attention to Detail, Analytical Thinking, Problem-Solving, Debugging, Requirements Analysis, Organization, and Ability to Follow Detailed Instructions and Standardized Procedures
